An internal example: sample.

An external example: bib2gls (command line application to convert from .bib to .glstex).

# Glossary

This document is incomplete. The external file associated with the glossary 'main' (which should be called `sample-external.gls`) hasn't been created.

Check the contents of the file `sample-external.glo`. If it's empty, that means you haven't indexed any of your entries in this glossary (using commands like `\gls` or `\glsadd`) so this list can't be generated. If the file isn't empty, the document build process hasn't been completed.

If you don't want this glossary, add `nomain` to your package option list when you load `glossaries-extra.sty`. For example:

```
\usepackage[nomain]{glossaries-extra}
```

Try one of the following:

- Add `automake` to your package option list when you load `glossaries-extra.sty`. For example:

  ```
  \usepackage[automake]{glossaries-extra}
  ```

- Run the external (Lua) application:

  ```
  makeglossaries-lite.lua "sample-external"
  ```

- Run the external (Perl) application:

  ```
  makeglossaries "sample-external"
  ```

Then rerun LaTeX on this document.
This message will be removed once the problem has been fixed.
