

An internal example: `sample`.

An external example: `bib2gls` (command line application to convert from `.bib` to `.glstex`).

Glossary

This document is incomplete. The external file associated with the glossary ‘main’ (which should be called `sample-external.gls`) hasn’t been created.

Check the contents of the file `sample-external.glo`. If it’s empty, that means you haven’t indexed any of your entries in this glossary (using commands like `\gls` or `\glsadd`) so this list can’t be generated. If the file isn’t empty, the document build process hasn’t been completed.

If you don’t want this glossary, add `nomain` to your package option list when you load `glossaries-extra.sty`. For example:

```
\usepackage[nomain]{glossaries-extra}
```

Try one of the following:

- Add `automake` to your package option list when you load `glossaries-extra.sty`.
For example:

```
\usepackage[automake]{glossaries-extra}
```

- Run the external (Lua) application:

```
makeglossaries-lite.lua "sample-external"
```

- Run the external (Perl) application:

```
makeglossaries "sample-external"
```

Then rerun L^AT_EX on this document.

This message will be removed once the problem has been fixed.
